PROJECTS

Dungeon Delver — Browser Game

Personal project · Live on GitHub Pages

- Built a top-down dungeon-crawling, coin-collecting game in JavaScript and HTML5 Canvas.

Job Tracker — Full-Stack Web App

Personal project · ASP.NET Core, React, TypeScript

- Built a REST API (ASP.NET Core 8, EF Core, SQLite) with JWT auth and BCrypt password hashing, plus a React/TypeScript front end with filtering, sorting and a stats dashboard.

Log Anomaly Detector — CLI Tool

Personal project · Python, SQLite

- Parses SSH auth logs with regex and uses sliding-window rules to flag brute-force attempts and traffic spikes, storing results in SQLite with a severity-sorted report.

AnimeNest — Web Application

Web II course project

- Built a full-CRUD web application in an MVC architecture backed by a relational database.

Home Calendar — Desktop Application

Application Development course project · Team of 3

- Developed a C# desktop app (MVP pattern, SQLite) in Scrum sprints with two other developers.
